

## **EFSS Production Contract**

Published 12/9/2008

As we close out with the final contract option executed off the PM EFSS contract vehicle, the Program Manager for Ammunition moves out smartly on a Production Contract for the EFSS ammunition suite. Months ago, PM Ammunition personnel formulated the plans for the smooth transition from the Program Manager, Expeditionary Fire Support System (EFSS) office while continuing to meet their demanding fielding schedule. This final contract option was awarded on 19 November 2008 which brings us to a new era...

PM Ammunition contracting efforts continue with the Acquisition Plan routing within the command for final approval and signature. The ammunition specifications have been reviewed and were finalized by Naval Surface Warfare Center Division, Dahlgren and Program Manager for Ammunition personnel with final approval given by the Program Manager on 6 December 2008. The Assistant Secretary of the Navy, Justification and Approval (J&A) is being drafted and will await final Acquisition Plan approval prior to submission.
