

## **IMSD Updates**

Published 10/14/2008

As previously mentioned FY08 was a year of evolution for IMSD. We believe this evolution will enable us to improve our performance for FY09. Our teaming arrangements are already paying Dividends. Our A&E Team provided a brief at the Naval Logistics Integration workshop held in Sep 08 which was well received and sparked interest at the Deputy Commandant, Installations & Logistics (DC I&L) level. The I&M team and its partner are deep into defining our Inventory Management Strategy that will link our lot grading efforts to our sourcing in support of requirements. The Systems Team and its partner are now managing our Automated Ammunition Information Systems (AAIS) portfolio. Change Advisory Boards (CAB) have been chartered for the Marine Ammunition Knowledge Enterprise (MAKE) and Ordnance Information System-Marine Corps (OIS-MC). I'd recommend you view each Team's page for more detailed info. We look forward to a productive and synergistic FY09.
