

MPF Program

Published 9/29/2008

The Maritime Prepositioning Force (MPF) program has been undergoing changes to accommodate the termination of several long term ship leases. The five Maersk class ships' (Phillips, Baugh, Hauge, Anderson, and Bonnyman) leases recently came up for renewal, and Headquarters Marine Corps decided not to extend those leases. The ammunition from these ships will be combined and placed onto another vessel, which will become a swing ship to support MPF. This vessel will not be assigned to any one Maritime Prepositioning Squadron (MPS) but will be available to augment an MPS as needed. Additional information can be found at <http://www.mcpic.bic.usmc.mil/>.
