

News to use (AP&BD)-Aug 2010

Published 8/12/2010

Transition- The Marine Corps has embraced the transition of ammunition items to the SMCA per Joint Conventional Ammunition Policies and Procedures (JCAPPs) Chapter 2. The Program for Ammunition working with the Army is aggressively working to transition Marine Corps developed items to the SMCA for future procurements. This includes APOBS, MK281 40mm training round, AT-4 rocket, SMAW rockets, the Marine Corps Nonlethal capabilities suite and KM03 floating smoke pot. This will provide the DOD improved economics and protect the US Industrial Base.
