

Senior Ammunition Symposium

Published 7/29/2008

The Analysis and Evaluation Team briefed at the 2007 Explosives Safety Inspection Meeting in October at the College of Southern Maryland in LaPlata, Maryland. The presentation was centered on the changes to the Program 15 Explosive Safety Inspection checklist, the use of the Physical Inventory Control Program (PICP), and the use of the Management Reporting Tool (MRT) by Marine Corps Supporting Activities. In addition to the P15, PICP, and MRT briefs the Marine Corps Class V(W) Ammunition Logistics Focus Team (ALFT) and current edition of the Ammunition Management Guide (AMG) were also briefed. The briefings are directly in alignment with our Strategic Goal of Optimizing Business Practices, Policies, Procedures, and Information Systems for Effectiveness and our Supporting Objective of Optimizing the supply Class V(W) ammunition post-production logistics chain.
