PRODUCT MANAGER INFANTRY COMBAT EQUIPMENT

CORPSMAN ASSAULT SYSTEM

Overview: The Corpsman Assault System (CAS) is a SL-3 component of the Pack, Assemblage Medical, TAMCN C53322E, which includes Class VIII supplies and is managed by Product Manager, Combat Support Equipment, Program Manager, Combat Support Systems. The CAS design is government owned and replaces the Corpsman Assault Pack (CAP) of the Individual Load Bearing Equipment (ILBE) Pack System. It is part of the Family of ILBE.

Features: The CAS is a modular/scalable medical first responder bag system tailorable to casualty expectations and mission duration.

Components: The CAS consists of four bags: the medical assault pack, a medical sustainment bag, a medical thigh rig, and a modular medical pouch. It also includes reconfigurable internal components: a narcotics pouch, two medium pouches, two large pouches, two small reversible pouches, two medium reversible pouches, two elastic panels, a double pocket panel, a stacked pocket panel, and a triple pocket panel.

Approved Acquisition Objective (AAO): The CAS quantity authorized for peacetime and wartime requirements to equip and sustain the force in accordance with current DoD plans and policies is listed in the table below.

UNIT	AAO
I MEF	1,942
II MEF	1,796
III MEF	1,085
MFR	1,320
BPS	561
MARSOC	267
SPT	1,045
TOTAL	8,016

Concept of Distribution: One per FMF Corpsman excluding E-9s

Fielding Status: Fielding complete

Requirements Document: ILBE Capabilities Development Document (CDD) Change 1, 23 Feb 2005

Training: Training will be initially provided by the Fleet Medical Training Battalions for the CAP. Follow-on training will be provided by Battalion Aid Stations or equivalent medical units.

Manuals: None
