

YOUR EQUIPMENT IS THE FIRST LINE OF DEFENSE

MARINE CORPS SYSTEMS COMMAND

PRODUCT MANAGER INFANTRY COMBAT EQUIPMENT

Overview: The Deployment Bag greatly enhances the individual Marine's ability to transport issued equipment on deployment.

Features: The Deployment Bag is reinforced at all stitched areas. Every seam is reinforced with Military Specification (MIL SPEC) binding tape to cover all raw edges and minimize water penetration. The dimensions of the Deployment Bag are 30"X14"X14" when emptied and the max load out weight is 75 pounds. The Deployment Bag is built with a foam design which utilizes six pound polyethylene rigid foam construction providing padding and protection for gear. When emptied it stands tall but can be folded down for storage like a collapsible footlocker. It has multiple mesh pockets under the lid and a large storage compartment with easy accessibility to function like a footlocker. Built to commercial air specifications, it can be carried like a rucksack (11 pounds empty) with its detachable heavy duty shoulder straps or can be rolled on its wheel system. The wheels are made of strong polyurethane and assembled inside of durable stainless steel housing.

Components: N/A

Approved Acquisition Objective (AAO): The Deployment Bag quantity authorized for peacetime and wartime requirements to equip and sustain the force in accordance with current DoD plans and policies is listed in the table:

DEPLOYMENT BAG

UNIT	AAO
I MEF	12,000
II MEF	12,000
III MEF	6,000
SPT EST	40,000
TOTAL	70,000

Concept of Distribution: One per Deployer

Fielding Status: Fielding complete

Requirements Document: Statement of Need (SON) with Change 1 dated 2 Jul 2010

Training: None

Manuals: Care and use card with each system
