

24 VOLT MULTI-RADIO POWER ADAPTER TOWER

TAMCN: H7715

ID: 11802A

NSN: 5935-01-578-7684

Functional Description

The 24 Volt Multi Radio Power Adapter also known as the 24V tower is designed to power one or four 12-24V radios using 110 VAC and/or 24VDC connects to a tactical vehicle via a supplied NATO plug cable. While fully capable of operating from either an 110VAC or 24VDC power source, the 24V tower is more effective when both are used together because the vehicle battery acts as a UPS for your radios. The 24V tower is designed to stand upright.

Technical Description

Power Supply

Manufacturer: Graywacke
 Model: GEI24-RPA-T

Power

Input: 24 VDC
 110 VAC

Input Range: 18-36 VDC
 90-240 VAC

Warranty

1 1/2 Years

Dimensions

Depth (in): 16
 Length (in): 23.5
 Width (in): 14
 Weight (lbs): 57.6
 Volume (ft³): 3.04

Temperatures

Operating: 0°C to +40°C
 32°F to +104°F
 Storage: -20°C to +80°C
 -4°F to +176°F

NOTES: Not intended for use in vehicles while on the move.
