

COLLAPSIBLE COATED-FABRIC FUEL DRUM																																																																																	
	TAMCN: B0570																																																																																
	ID: 04486B																																																																																
	NSN: 8110-01-965-2313																																																																																
Functional Description																																																																																	
<p>The Collapsible Coated-Fabric Fuel Drum is a durable, non-vented, hermetically sealed, collapsible coated-fabric container used to store and transport aviation turbine fuels, gasoline, and other bulk petroleum products with a 500 gallon storage capacity. It is an SL-3 component of the Helicopter Expedient Refueling Systems (HERS) (TAMCN B1135) and is associated with the Expedient Refueling System (ERS) (TAMCN B1570). It is cylindrical when filled to capacity. Yoke, Towing and Lifting (TAMCN B2730) is required if the drum is to be towed or lifted.</p>
