

SIXCON, FUEL STORAGE TANK MODULE																																									
	TAMCN: B2085																																								
	ID: 09002A																																								
	NSN: 5430-01-240-4578																																								
Functional Description																																									
<p>The SIXCON Fuel Storage Module is a component of the SIXCON system that consists of five tank modules and one pump module. The six modules attach together to form an ISO/ANSI configured 8x8x20 foot module. The SIXCON Fuel Storage Module is a stainless steel tank encased within the module frame and has the capacity of 900 gallons. It also has ancillary components necessary for interconnecting to other SIXCON Fuel Storage Tank and Pump Modules. The SIXCON can be used as a mobile and stationary refueling asset. Forklift support is required.</p>
