Approved for public release: distribution unlimited
SPR 2024-0289
POC: Jason Babcock; 301-481-1993;
jason.r.babcock3.ctr@us.navy.mil

The mission of PMA-261 is to develop, deliver, and sustain effective, suitable, affordable, and timely H-53 heavy lift capability and readiness for the warfighter throughout the program lifecycle

A large CH-53K helicopter is shown in flight, lifting a smaller aircraft (likely a UH-60 Black Hawk) by its hoist. The scene is set in a rugged, mountainous landscape with dense evergreen forests and rocky terrain. The sun is high in the sky, creating a bright, hazy atmosphere with lens flare effects. The helicopter's rotors are blurred due to motion.

200 aircraft program of record
14 CH-53K delivered
Secondary mission testing
Digital interoperability
Internal cargo

INDUSTRY CAN HELP

Look ahead – Take risk – Move fast

- ✓ Collaborate with peers
- ✓ Bring your "I" game
- ✓ Communicate with government on solution space
