## MARINE CORPS SYSTEMS COMMAND PROGRAM MANAGER INFANTRY COMBAT EQUIPMENT

### EXTREME COLD WEATHER SUIT

**Overview:** The Extreme Cold Weather (ECW) Suit provides protection in extreme cold weather environments. It is an over garment that consists of a parka, trouser, and booties. The ECW Suit is used in bivouac, rest, and sentry duties.

**Features:** The ECW Suit is lightweight and easily packed. The garments are oversized and designed with features to enable quick donning/doffing over multiple clothing layers. The shell material is water repellent and wind resistant. The insulation maintains uniform thickness and insulating properties after repeated packing, unpacking, and commercial launderings. The garments do not allow wind to penetrate and are quick drying. Booties are not to be used in conjunction with VB boots while on a movement.

**Components:** Parka, trousers, and booties
