MARINE CORPS SYSTEMS COMMAND PROGRAM MANAGER INFANTRY COMBAT EQUIPMENT

PROTECTIVE UNDERGARMENT

Overview: The Protective Undergarment (PUG) is a lightweight undergarment that provides wound mitigation and protection of the skin in the groin and upper leg area for Marines and Sailors subjected to the subcutaneous insertion of sand and small debris experienced during an Improvised Explosive Device (IED) attack.

Features: In addition to its ballistic capabilities, the undergarment is antimicrobial, flame resistant (objective: no melt, no drip), allows for the transmission of water vapor, is air permeable, is made of stretchable fabric, and requires no special care and handling. Available in male and female.

Components: N/A

Approved Acquisition Objective (AAO):

UNIT	AAO
I MEF	17,400
II MEF	18,400
III MEF	9,350
MARFORRES	0
MARFORCENT	0
MARFORSOC	0
WRMR	0
DMFA	0
SPT EST	0
TOTAL	45,150

Concept of Distribution: Four per deployer

Fielding Status: Fielding complete. Item available at CSP.

Requirements Document: Urgent Statement of Need (USON) for the Tier 1 PUG with Change 1, dated 11 May 2011. Achieved Program of Record status 31 Dec 2015.

Training: Can be coordinated through Program Manager, ICE.

Manuals: Use and Care instructions are provided with each PUG set.

PM ICE Serviceability Standard:

TM 4451-20/1
