INTERMEDIATE COLD WEATHER GLOVE

Overview: The Intermediate Cold Weather Glove (ICWG) is composed of three layers – an insulation layer, a waterproof breathable insert, and an outer shell of a durable, water resistant/vapor permeable material (nylon, leather).

Features: The glove has a waterproof breathable insert. The outer shell is constructed in a gauntlet design that fits over the sleeve of the Extended Cold Weather Parka. It has a wrist closure designed to prevent the entry of cold air or snow. The ICWG is designed to be worn in cold weather environments to protect the user from snow, wind, and ice with a threshold temperature range from 40 degrees to 0 degrees Fahrenheit.

Components: N/A

Approved Acquisition Objective (AAO):

UNIT	AAO
I MEF	25,598
II MEF	26,328
III MEF	21,209
MARFORRES	20,784
MARFORCENT	0
MARFORSOC	2,468
WRMR	0
DMFA	0
SPT EST	10,448
TOTAL	106,835

Concept of Distribution: One pair per warfighter as required for Cold Weather Training and Operations through the Unit Issue Facility.

Fielding Status: Complete

Requirements Document: ICWG Capabilities Development Document (CDD) Letter 5311 C14, 25 April 2014

Training: None

Manuals: None
