Functional Description

The SIXCON Fuel Storage Module is a component of the SIXCON system that consists of five tank modules and one pump module. The six modules attach together to form an ISO/ANSI configured 8x8x20 foot module. The SIXCON Fuel Storage Module is a stainless steel tank encased within the module frame and has the storage capacity of 900 gallons. It also has ancillary components necessary for interconnecting to other SIXCON Fuel Storage Tank and Pump Modules. The SIXCON can be used as a mobile and stationary refueling asset. The SIXCON Fuel Storage Module can be deployed as a complete system or tailored to meet specific mission requirements.
