VISION & MISSION

COMMANDER'S VISION

Marines have the capabilities they need to fight and win against any adversary in any clime and place

COMMAND'S MISSION

Equip our Marines with the most capable ground and information technology weapon systems in order to maximize their expeditionary readiness and combat effectiveness in all domains.

PRIORITIES & FOCUS AREAS

People

Attract, develop, and retain the most talented and best performing acquisition professionals

Partnerships

Build and maintain collaborative relationships with the FMF and key stakeholders through trust, transparency, and regular communication

Programs

Empower program managers to accelerate delivery of capabilities through disciplined, agile execution and balanced risk management

Program Manager's Top 5 Priorities

- **Warfighter Focused**
- Continuously Improved Our Culture Daily
- Speed of Relevance
- Innovative Organization
- Improve Communication and Collaboration

Vision

Marines have the training systems they need to prepare to fight and win against any adversary in any clime and place

Training and Education 2030

- **Training and Education 2030 – Key Conclusions (PM TRASYS focused)**
 - The Marine Corps should further emphasize T&E in order to drive individual, unit, and collective readiness.
 - There is insufficient FoF training in the Marine Corps.
 - Synthetic training capabilities are major combat multipliers that are severely underdeveloped and under-resourced.
 - The current T&E system is not preparing the Marine Corps for the future operating environment.
- **Live, Virtual, and Constructive Training Environment (LVC-TE)**
 - LVC-TE will serve as the cornerstone of how the Marine Corps builds combat readiness during this critical time of transformation. The proliferation of expeditionary long-range precision fires, loitering munitions, infantry battalion organic precision fires, unmanned systems, and electronic warfare capabilities, among others, will significantly challenge our ability to train collectively and build combat readiness.
 - Project Tripoli and the LVC-TE it creates will provide the means to conduct fully integrated training at all echelons, in all-domains, connected across disparate locations. In its fully mature state, the LVC-TE will create the system interoperability we need to fully integrate with joint and international LVC capabilities.

Marines must have the knowledge and range of skills required to thrive in a complex multidomain battlespace. ...Success will depend upon our ability to better leverage technology, become more data-driven, and improve how we utilize available resources.

Force on Force Training System (FOFTS) Next

The Marine Corps Tactical Instrumentation System- Weapon Surrogates (MCTIS-WS) is a new capability for the Marine Corps. MCTIS-WS will replicate form, fit and function for infantry weapons where mounting a SAT is not feasible. The surrogate weapons developed will be a complete simulated weapon that allows training for Marines where it is not feasible to utilize the actual weapons system. WS includes grenades, mines, direct and indirect fire weapons.

ACQUISITION STRATEGY

- Weapons Surrogates - TReX

PERIOD OF PERFORMANCE

- Projected 9-month Agreement
- Projected 24-month Agreement

POINT OF CONTACT

PM TRASYS

Email: pmtrasys@usmc.mil

FUNDING

- Estimated Value : \$6-8M

Live Fire Evaluation Tool (LFET)

LFET is currently in the requirements development process. LFET is a live-fire scoring system that uses acoustic / impact technology and individual shot timestamps / Global Positioning System (GPS) breadcrumbs to produce high fidelity After Action Reports (AAR) directly after shooting. LFET systems will provide the capability at designated live-fire maneuver ranges. This capability will support up to a squad size unit evaluation at any one time. The system will also work with existing or upgraded target control software and hardware.

ACQUISITION STRATEGY

- TBD

PERIOD OF PERFORMANCE

- TBD

POINT OF CONTACT

Email: pmtrasys@usmc.mil

FUNDING

- Estimated Value: \$4M RDTE

MARINE CORPS SYSTEMS COMMAND

Equipping our MARINES

RTS

Electromagnetic Warfare Ground Instrumented Range (EWGIR)

EWGIR is intended to be integrated into existing Ground and Military Operations on Urban Terrain (MOUT) Ranges to provide a realistic RF/GPS jammed or spoofed (spectrum denied/degraded) training environment which will enhance small unit tactics and ability to engage peer adversaries. Currently undergoing market research in conjunction with agency partners (e.g., ONR, PEO STRI, etc.) in which viable systems will be evaluated based on technical maturity, ease of use and technical performance.

ACQUISITION STRATEGY

- TBD (SBIR, OTA, and/or Other)

PERIOD OF PERFORMANCE

- TBD

POINT OF CONTACT

PM TRASYS
Phone: 407-381-8762
Email: pmtrasys@usmc.mil

FUNDING

- Estimated Value: TBD

Known Distance Automated Scoring (KDAS)

KDAS systems on designated known distance rifle ranges will allow Marines to accomplish their annual rifle marksmanship qualification (ARQ) in a more efficient manner by reducing the need for Marines to manually operate, score, and repair targets for stationary stages of fire. These capabilities modernize known distance (KD) rifle ranges by expediting ARQ through reduced time spent in the pits, more rapid and accurate feedback to the shooters on the firing line, and reduced need for alibis and additional shooting due to human error.

ACQUISITION STRATEGY

- OTA (ACC Orlando - TReX II):
Development, Test, Evaluation & Production

PERIOD OF PERFORMANCE

- Estimated:
 - Phase 0-3: 12 months
 - Phase 4: 24 months

MAGTF Training Systems Support (MTSS)

Description/Summary of Program Requirements

- PM TRASYS awarded a Multiple Award Task Order Contract (MATOC) in March of 2019 that is primarily aligned with the Knowledge Based Services Portfolio Group within DoD's Taxonomy of Services. The MTSS MATOC is structured for maximum flexibility, providing an expedited ordering process to procure knowledge based services to satisfy training and education requirements for TECOM organizations.

MARINE CORPS SYSTEMS COMMAND

Equipping our MARINES

TS4

Indoor Simulated Marksmanship Trainer (ISMT)

ISMT is an existing capability that uses simulation to instill and sustain Marines and Sailors in marksmanship fundamentals, crew served weapons employment, call for fire and tactical decision making. ASALT is a new capability intended to provide an enhanced capability that directly supports weapons proficiency training to include updated scoring, team/squad drills, and advanced techniques within a simulated environment. The software support is anticipated to support both.

ACQUISITION STRATEGY

- ECS MATOC
- 5-year contract

PERIOD OF PERFORMANCE

- FY25 – FY29
